Intellectual Property

Together, copyright, patent and trade secret legislation form a complex body of law that addresses the ownership of IP.

Copyright: A copyright is the exclusive right to distribute, display, perform or reproduce an original work in copies or to prepare derivative works based on the work. Copyright protection is granted there.

(Copyright © 2021 by [Name])

copyright infringement is a violation of the rights reserved by the owner of the. Copyright infringement occurs when someone copies a substantial and material part of another's copyright work without permission.

17.09.19

Patent: A patent is a grant of property - right issued by the United States patent and trademark office

(USPTO) to an inventor. A patent permits its owner to ^{exclude} ~~exclude~~ the public from making, using or selling a protected invention. And it allows ~~to~~ for legal action against violators. A patent prevents independent creation as well as copyright.

It can
understand

Patent infringement

the violation of the right secured by the owner of a patent, occurs when someone makes unauthorized use of another's patent. Unlike copyright infringement, there is no specified limit to the monetary penalty of ~~per~~ patent infringement is found.

Quality \rightarrow ~~the~~ behavior ~~with~~ customer ~~is~~ need to meet the requirement

* Software Quality is a degree to which a software product meet the needs of its users.

Quality management focuses on defining, measuring and refining the quality of the development process and the products

developed during its various stages.

These products — includes statement of requirements, flowcharts and user documentation

— are known as deliverable. The object of the quality management is to help developers

deliver high-quality.

meet the needs of their users.
